EDUCATION

K. K. Wagh Institute of Engineering Nashik, India
BE Computer Engineering
2020-2024

Matoshri Junior College Nashik -2020 HSC Science
Percentage: 78.92%
Mathematics: 94/100

St Francis High School Nashik, India -2018 SSC
Percentage: 87.80%
Mathematics: 100/100

SKILLS

Languages: C++, Python, JavaScript, Html and CSS

Fundamentals: Object-Oriented Programming, DSA

Database: Relational, SQLite

Framework: Django, React, React Native

Tools: Postman, Git and GitHub, SQLite Database

WORK EXPERIENCE

Software Developer

MBlazr Pune, India

- Job Through **Upwork**
- MBlazr is a startup mainly based on analyzing the stock market and displaying it in a clear way to make the work fast and save the time of investors.
- Optimized the extraction of Data from the published paper using beautiful soup in python.

Projects

LookUp

- Our First-year PBL project is based on the topic Online Site for connecting students and teachers
- **Website:** <https://suhaanchetanfenilpbl.pythonanywhere.com/student-page>
- **Technologies:** React, Django, Postman, Git and GitHub, Html, CSS

Typing Multiplayer

- Live Demo: <https://typing-fight.glitch.me/>
- Code: <https://github.com/Suhaan-Bhandary/TypingFightMultiplayer>
- **Practice typing** with friends and also **chat** with them!
- **Technologies:** Javascript, npm package manager, SocketIo, Html, Css, glitch for hosting

Django Blog

- Live Demo: <https://suhaanbhandary.pythonanywhere.com/>
- Blog made with Python using Django Framework with backend as **SQLite** and styling with **CSS** and **Javascript**.
- **Django** Blog hosted on Python Anywhere.

Algorithm Visualizer and Maze Generator

- Algorithm Visualizer: <https://suhaan-bhandary.github.io/Path-Finding-Visualizer/>
- Maze Generator: <https://suhaan-bhandary.github.io/Maze-Generator-DFS/>
- Algorithm Visualizer used to visualize algorithms, which reduced the testing time and improved the development and learning process.
- Got knowledge of **frontend development** and started learning **React** and improved **CSS** and **JS** skills.

Other Projects and Achievements

- Developed **Quine McClusky** Implementation for minimizing Boolean Expressions using C++.
- Developed **Warshall's Algorithm** in JavaScript [<https://suhaan-bhandary.github.io/warshallsAlgorithm/>]
- Took Part in Elocution Completion and C++ coding competitions.
- Elected to Green House Captain in 9th Standard
- **Typing:** 60wpm
